This is limited to 20 employees because we set it up for smaller contractors. If you have more employees, here's a workaround: (1) Save your file. (2) Copy the file -- make sure you give it a different name. (3) Open this same tab in that new copied file. (4) Delete those first 20 employees you entered before. (5) Enter the information on your remaining employees.

START HERE!

1 Use the drop-down menu to select those employees who worked this week.

2 Select the trade or type of work they performed.

3 Select their position: apprentice, worker, supervisor, etc.

Double-check this! Is this the right pay date? If not, go back

For your second and subsequent reports, you can start here (Tab 5), because your employees' information is already filled in. **But before you start, delete last week's entries on this page (Tab 5) through Tab 8.** Just one old entry (your carpenter worked 8 hours, not 10) can screw up the accuracy of your entire report.

4 Enter below the hours your employees worked each day. Be very accurate about overtime!

All blue cells are autofilled for you.

As a courtesy, we've added the "Target' Base Hourly Rate" and "Target' Fringe Benefit Rate" and compared them to what you're actually paying. If the "Difference of (A) vs (B)" result is negative, you may have made an error. Go back and check your numbers! A surplus is not a problem. Employers always have the option to pay more than the prevailing wage rate.
