So what is Yale responsible for....

-  Apple's iPhone45:52

No affixing signs to trees on public property Private trees should need arborists assessment and conference with tree warden. Should save every matures tree over 3" caliper for climate / community benefits.

-  Anstress Farwell46:37

Toronto does offer protection for some trees on private property. It's worth looking at their ordinance and manual. <https://www.toronto.ca/services-payments/building-construction/tree-ravine-protection-permits/>

Setting goals around climate change and community health could reinforce value of saving trees on private land

Tweed cut down an acre of Trees on city property ... there isn't enough knowledge about what can be done, who to call and who can help

-  Apple's iPhone50:36

Eagle Trees were removed though city plan approval process. Not sure if an offset was calculated as part of that review.

Berkeley CA has designated one protected tree species (coast live oak). Any construction project on private or public land that impacts a protected tree has to follow tree protection guidelines. A way to go?
