- The labor force participation rate fell slightly in October. The rate decreased among Black or African Americans (-.02%) and stayed the same among Latino or Hispanic Americans as well as White Americans.
- The labor force participation rate increased by 0.2% among women in September and decreased by .02% among men.

Broad Economic Impacts

Impacts on Consumer Confidence

An indicator above 100 signals a boost in the consumers' confidence towards the future economic situation, because of which they are less prone to save, and more inclined to spend money on major purchases in the next 12 months.

Values below 100 indicate a pessimistic attitude towards future developments in the economy, possibly resulting in a tendency to save more and consume less.
